Henk van der Keur  
25 November 1963

- 1987            Diploma Organic Chemistry at the Higher School for Laboratory Education,  
                  Leiderdorp, the Netherlands
- 1987 – 1991    Molecular Biology, Wageningen University, the Netherlands
- 1988 – 1990    Travels to East European countries; getting acquainted with (the rise of) social  
                  movements, especially environmental movements. Visits to Ukraine, the Chernobyl  
                  region and groups, which support the rights of the victims of the Chernobyl disaster.
- 1990 - ....     Co-worker of the Laka Foundation, documentation and research centre on nuclear  
                  energy. Co-ordinator of the DU project.
- 1992            First acquaintance with military use of depleted uranium, just before and during a field  
                  mission to Iraq on behalf of Dutch and Belgian peace organisations.
- 1993            One year after the El Al plane crash in the Amsterdam district “Bijlmermeer”  
                  (Southeast), 4 October 1992, it became clear that DU counterweights were involved.

Articles, reports, brochures and other documents or information on DU is available at the Laka  
website: [www.laka.org](http://www.laka.org)
